The WDC is a collection of APIs that enables developers to connect Tableau to any data on the web. Use Cases: Create custom connections to data on the web and make that data available in Tableau. Benefits: Create your own WDC that reads data from virtually any site that publishes data in JSON, XML, or HTML.

Data Connectivity Tools & APIs | Tableau

Starting in 2019.3, Tableau Catalog is available in the Data Management Add-on to Tableau Server and Tableau Online. When Tableau Catalog is enabled in your environment, in addition to connecting to published data sources, you can connect to databases and tables from Tableau Server on the Connect pane in Tableau Desktop.

Connect to Your Data - Tableau

Now, you can connect Tableau directly to Splunk Enterprise and enable everyday users to start exploring this rich resource in seconds. Mash up unstructured data from Splunk with other cloud and on-premises sources to find new insights. Create stunning dashboards in minutes—with the confidence that they're always up-to-date.

Visualize Splunk Data in Tableau: Make your data interactive

Is there any documentation on how to connect Tableau (2019.02) to ElasticSearch? Tableau is on the Mac, ES is remote. I'm thinking JDBC maybe a good option but I doubt the ES is listening for JDBC connections.
