Female ejaculation? Prev NEXT . Also under debate is the composition of the fluid (sometimes called female ejaculate) that is expelled by some women during orgasm from G-spot stimulation. Some researchers claim that it is urine; others assert that it is a substance corresponding to seminal fluid in males (but without the sperm, of course)

Female ejaculation? - G-spot | HowStuffWorks

Female ejaculation refers to the expulsion of fluid from a female's urethra during orgasm or sexual arousal. The urethra is the duct that carries urine from the bladder to the outside of the body.

Female ejaculation: What is it, is it real, and are there ...

Often, female ejaculation is linked to manual stimulation of the g-spot, which can be accessed in the vagina, though it exists outside of it. The g-spot is actually the paraurethral glands, so in massaging or touching of these, which are under the vagina, it might stimulate a response of sudden production and expulsion of paraurethral fluid.
