Operations management is an area of management concerned with designing and controlling the process of production and redesigning business operations in the production of goods or services. It involves the responsibility of ensuring that business operations are efficient in terms of using as few resources as needed and effective in terms of meeting customer requirements.

### **Operations management - Wikipedia**

Operations management is important, it is exciting, and it is challenging. It is concerned with creating the products and services upon which we all depend and creating products and services is the very reason for any organization's existence, whether that organization be large or small, manufacturing or service, for profit or not for profit.
